Discover stunning technologies

HOLOEYE Photonics is one of the leading suppliers of spatial light modulators (SLM) based on liquid crystal micro displays and of diffractive optical elements (DOE) for scientific and industrial applications. Our development and engineering team is located in Berlin/Adlershof together with technical sales. Our international team of more than 30 colleagues supports research institutions and industrial customers worldwide by offering static diffractive micro-optics and adaptive spatial light modulators. In addition to offering standardized components, we also customize solutions according to customer requirements.

We are looking for you to strengthen our team with immediate effect or as soon as possible.

Tasks / activities

- Metrological tasks in the field of diffractive optics, for example measurement of diffraction orders (power and spectral composition)
- Inspection of the surfaces of diffractive optical elements

Education / qualification

- Studies of Physics, physical engineering or comparable
- From semester three on
- Approx. 40 hours/month

Offers / benefits

- Friendly team with a positive working atmosphere
- Modern and social working environment
- Flexible working hours / time model
- Sports and health management services as well as further voluntary social benefits
- Discrimination-free environment: We are an equal employment opportunity (EEO) as well as an affirmative action employer

Although the activity is not initially designed as a basis for a topic for a bachelor's or master's thesis, further development in this direction is conceivable.

If you are interested, please send your application and CV to our HR/Personal team:
